VAISHNAV SUNIL NAIR

Mumbai, India | +91 8879342421 | vaishu25nair@gmail.com
LinkedIn: www.linkedin.com/in/vaishnav-nair-31b811437
GitHub: https://github.com/mythicwarchief

Second-year B.Tech Computer Science and Engineering (Artificial Intelligence) student with strong analytical skills, keen on solving real-world business problems using AI and ML.

EDUCATION

B.Tech, Computer Science and Engineering (Artificial Intelligence) June 2025 - Present
Amrita Vishwa Vidyapeetham, Amritapuri Campus
CGPA: 7.64 / 10

TECHNICAL SKILLS

Languages: Python, Java, C
AI / ML: Machine Learning, Neural Networks, AI Agents, Agentic AI
Data: NumPy, Pandas, Data Processing
Development: UI Development, Full Stack Development, Backend Development, Streamlit
Frameworks / Tools: TensorFlow, Keras, Jupyter Notebook, Linux, Git, GitHub, pytest
Concepts: Object-Oriented Programming, Algorithm Analysis, Software Testing

PROJECTS

Smart Fire Evacuation Planner
AI-based evacuation system that finds routes from a starting point to an exit through a predefined building layout. Implemented and compared BFS, Dijkstra's algorithm and A* for route planning and evaluation.

AQI Prediction using Machine Learning
Machine learning project that forecasts air quality for Indian cities, built on 2015-2020 data from monitoring stations across the country. Studies pollution trends over time and predicts AQI for a chosen city and period, with filters to tailor the results.

SkillSwap
Peer-to-peer academic assistance platform where college students can offer and request help in academic subjects, encouraging knowledge sharing and student networking.

Digital Complaint Management System (DCMS) | *Java*
Complaint management system for submitting, assigning, tracking and updating complaints, with workflows covering users, assigned officers, administrators and resolution status.

NyayaBot | *Epochon 2.0 Hackathon, 2026*
Agentic AI project built for the Epochon 2.0 hackathon at Amrita Vishwa Vidyapeetham, applying AI agents to legal-domain tasks.

Nirikshan | *Smart India Hackathon 2026*
Hackathon project developed as part of Smart India Hackathon 2026.

CNN Implementation on MNIST | *Command-line application*
Built a convolutional neural network that recognises handwritten digits from the MNIST dataset, implemented as a command-line application.

Intelligent Ledger Orchestration System | *Ongoing*
Building a ledger orchestration system with a human-in-the-loop protocol, so that sanction decisions are reviewed and approved by a person.

ACTIVITIES

- Member, ACM Amritapuri Student Chapter, SIG-AI

CERTIFICATIONS AND PARTICIPATION

- **Certificate of Excellence,** ACM Debugging Session, ACM Student Chapter, Amrita Vishwa Vidyapeetham
- **Certificate of Participation,** Amrita University Amritapuri Campus Hackathon (team "Garuda"), 17-18 July 2026. Issued by Nitrostack and Wekan Enterprises

Certificates available on request.
